

Forest Umbrella

人気のない庭の隅っこに新しい休憩スペースを設けます。

敷地には木々が生え、有機的な状態を残しています。だから私たちは、人工的な構造物でありながらも自然の現象やシステムと呼応した小さな森のようなものをそこにつくりたいと思います。

We will set up a new break space at the unpopular garden in the university.

Trees grow on the site, leaving an organic state. So, we would like to create something like a small forest that responds to natural phenomena and systems while being an artificial structure.

Forest Umbrella

Site : green space of the ecole

Image picture

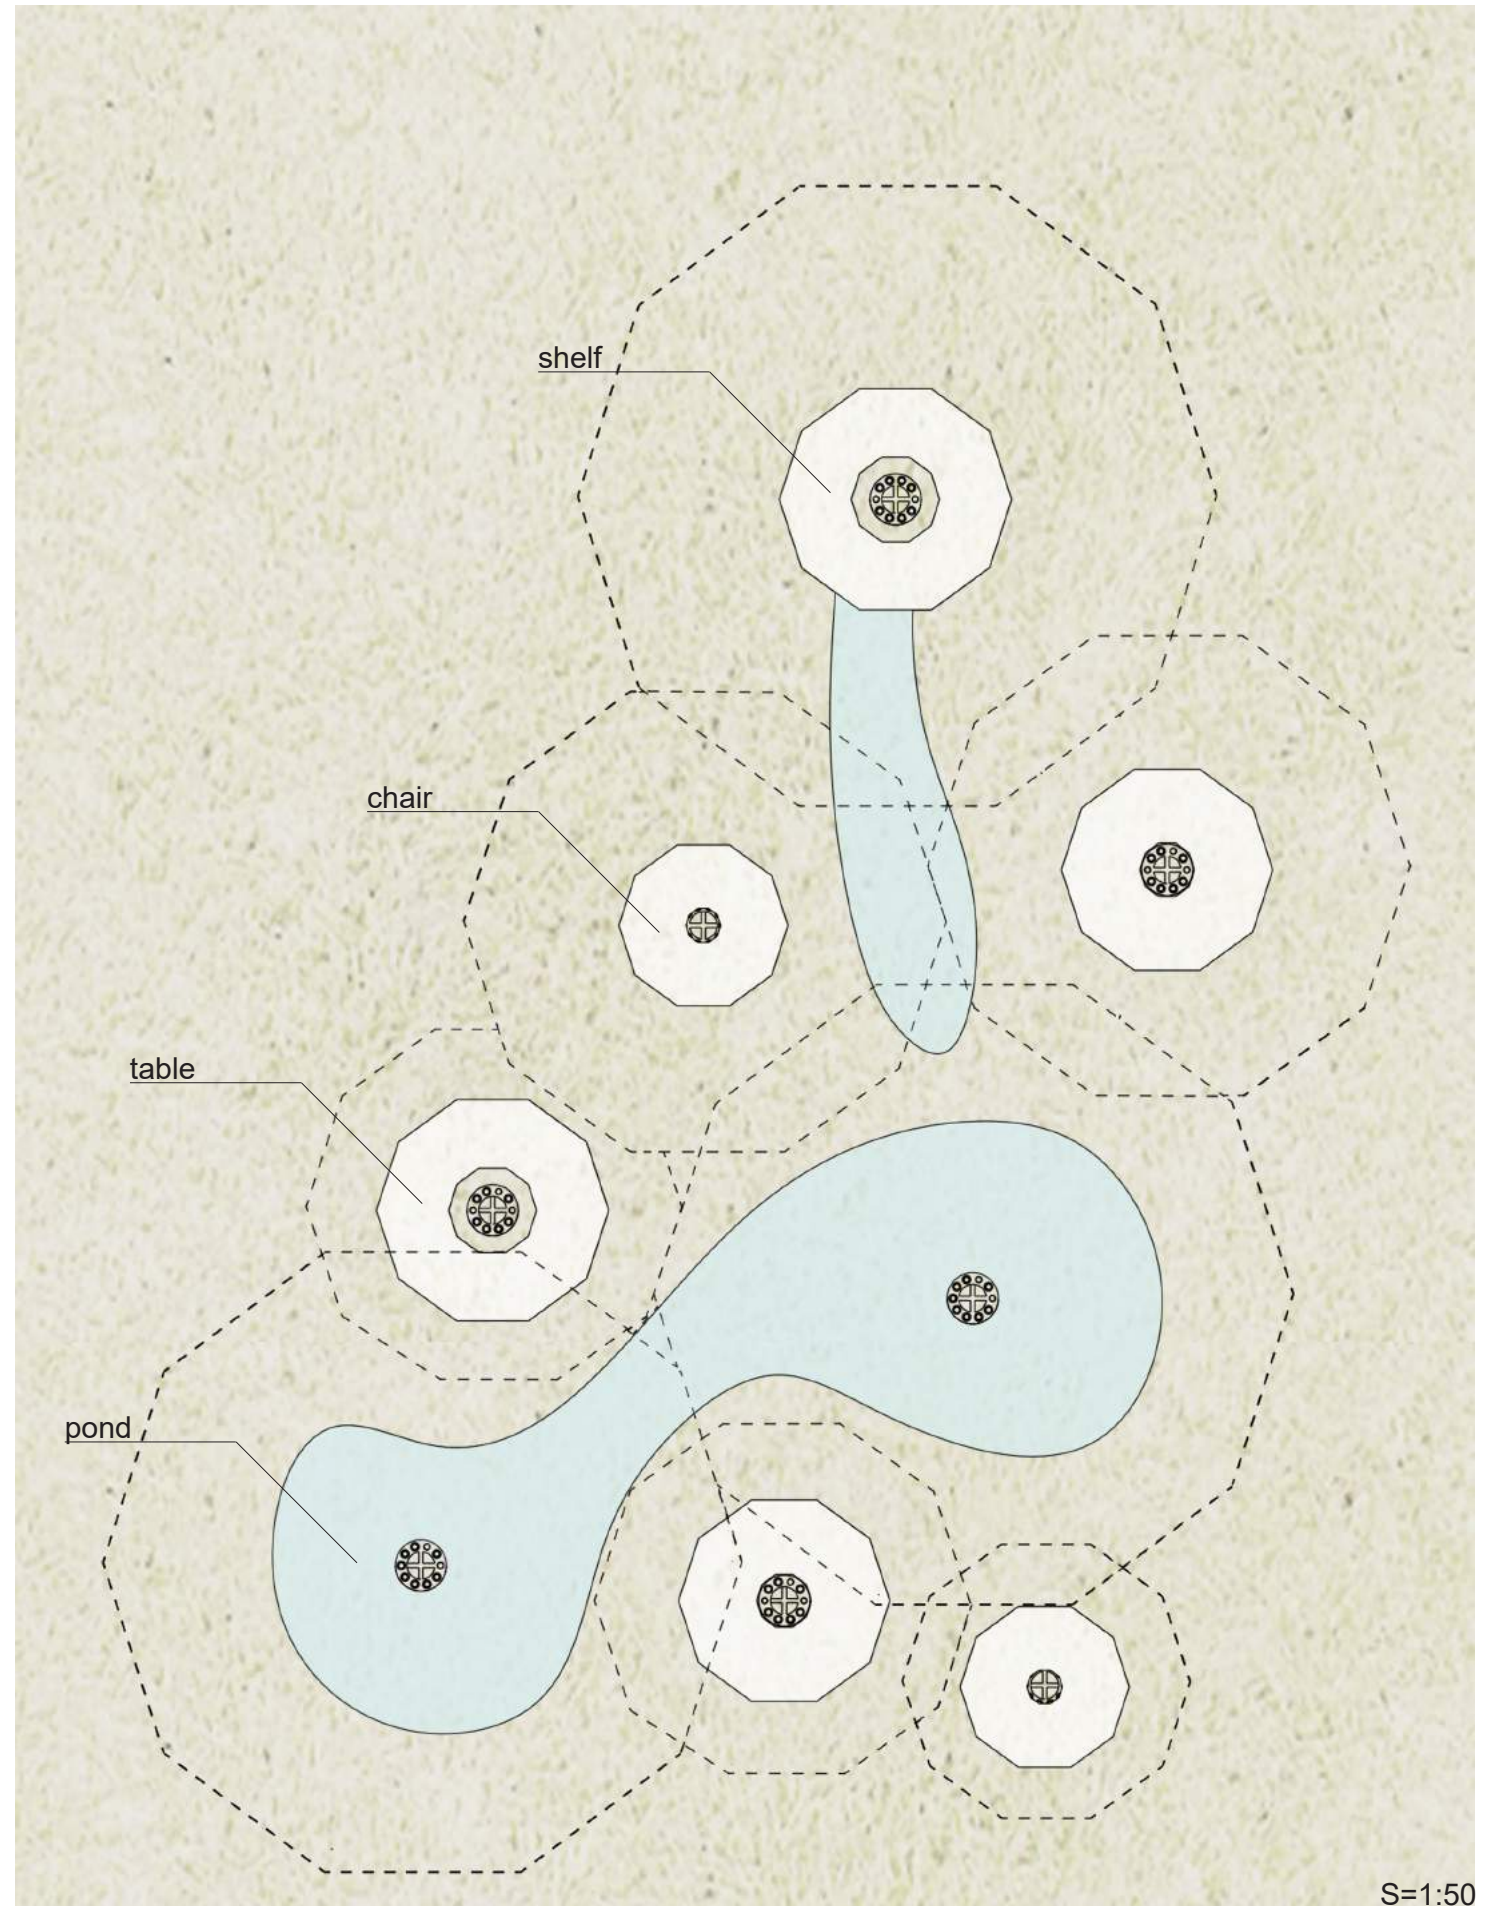

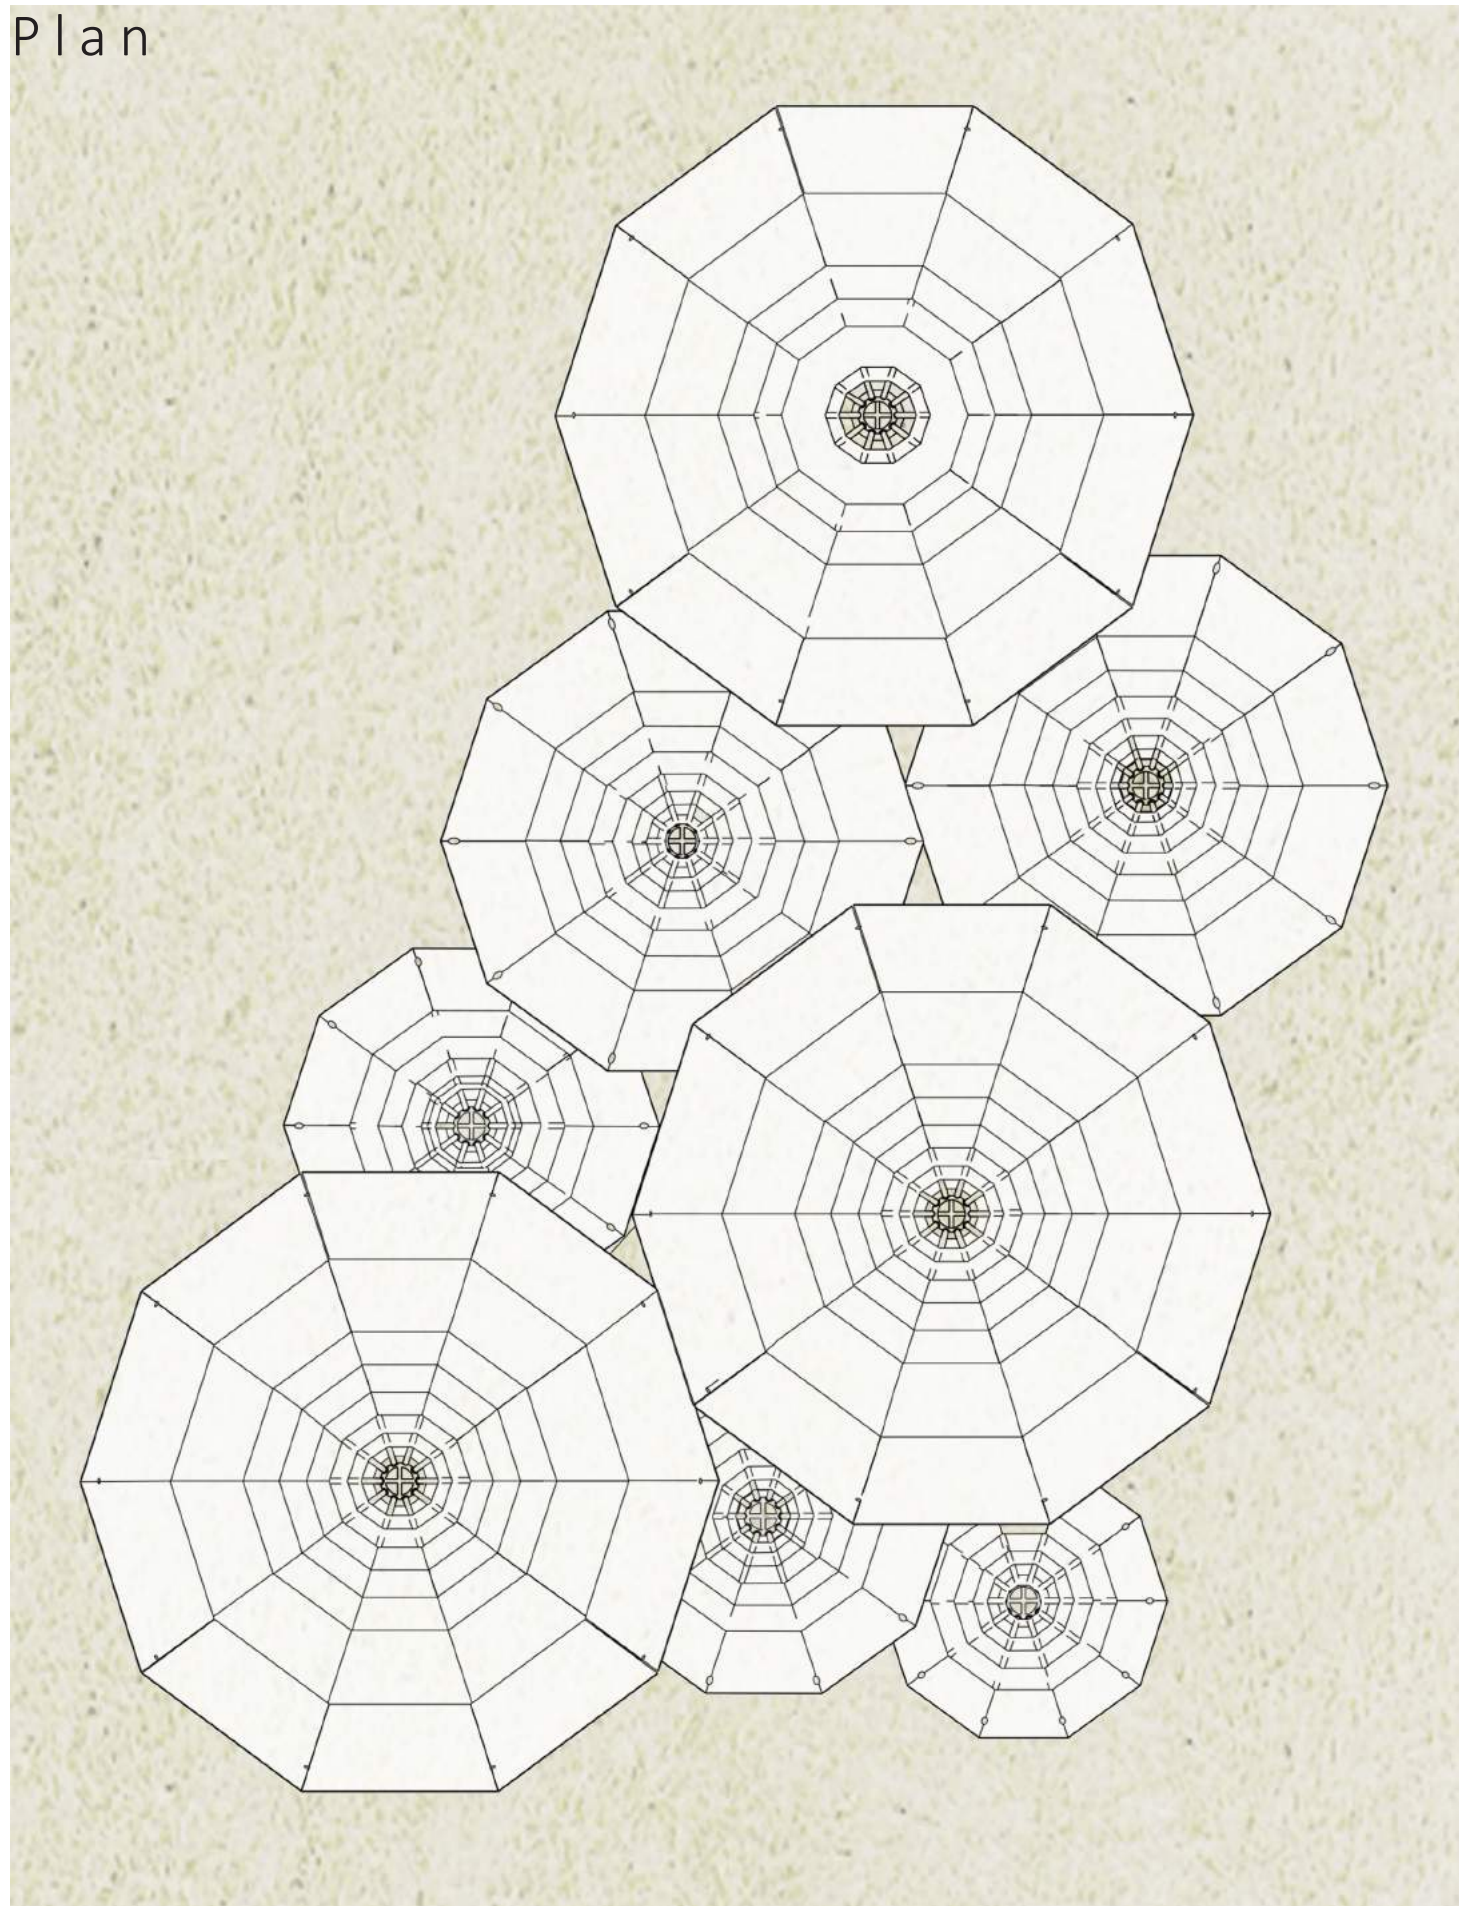

The site is courtyard of the ecole. This ecole has less green, but there are several trees at this site. However, very few people takes a break at there. We want to build a rest space which Harmonizes with nature.

In Paris, many people take a break at outside of cafes, under umbrellas. This is the context of Paris break style.

We make new Paris umbrella, and make small forest.

Usual umbrella just protects us from rain. However, when we reverse it, It looks like a tree and gathers water.
